ABSTRACT

The goal of this thesis is to look at the emergence of the thematic contemporary art exhibition in Italy through an analysis of the influence of Fascism and the commercial sector in the three exhibitions composing the *Cycle of Vitality*, organised between 1959 and 1961 at the Centro Internazionale delle Arti e del Costume (CIAC), opened at the Palazzo Grassi in Venice in 1951. The cycle falls within the fields of both curatorial studies and the history of modern and contemporary exhibitions, two disciplines that have been developed since the 1990s. This inquiry contributes to them by clarifying further their specific fields of investigation, or in presenting alternative genealogies by casting light on overlooked antecedents; and by addressing the curator as a distinct cultural producer, the institution as a medium for social change and the history of exhibitions.

The exhibitions analysed belong to the genealogy that resulted from the shift in the display language of international inter-war avant-garde experiments in exhibition design as manipulated by Fascism and commerce in the 1930s. Modernist architects were engaged in turning the exhibition into a medium for social change, and a mass-medium to bring a sense of the future into the present: It was from this premise that the model of the thematic exhibition emerged. Its further development in post-war Italy paralleled the questioning of the fine art museum's entanglement with the discipline of art history, enacted by those architects trained in the 1930s. The *Cycle of Vitality* paired the two models in the thematic contemporary art exhibitions – *Vitalità nell'arte* (1959); *Dalla natura all'arte* (1960) and *Arte e contemplazione* (1961) – organised by curators *avant-la-lettre* Paolo Marinotti and Willem Sandberg.

Crucial to the analysis of the *Cycle of Vitality* is the questioning of the relationship between contemporary curators, museums and the discipline of art history, as a consequence of Italian exhibition culture between 1932 and 1961. Within this historical framework, these exhibitions were influenced by the original profile of the CIAC, a cultural centre sponsored by the SNIA Viscosa, a company manufacturing man-made fibres. The CIAC allowed for the development of exhibitions that were intended to reshape the social body rather than to present the results of art historical research as was traditionally the role of museum or fine art exhibitions. In the 1950s, modernist Italian architects played a strategic role in rethinking the museum, a tendency further fostered by curators *avant-la-lettre* who, as cultural producers, turned the institution into their medium rather than considering it a function of the discipline of art history.

ACKNOWLEDGEMENTS

This dissertation is indebted to the people and institutions that helped me while I was developing my ideas over far too long a period of time. The Royal College of Art and its Curating Contemporary Art Department have been encouraging and supportive throughout the years. Special thanks are due to Jean Fisher, Fiona Key and Alex Farquharson, whose course on curatorial practice provided me with a full insight into the subject from an Anglo-Saxon perspective. I am deeply grateful to my supervisors Mark Nash and Claire Bishop, who have been generous with their time, patience and insights.

Particular thanks are due to Christian Marinotti, who opened up his family archive to me. The following institutions and individuals gave me access to their archives, without which this dissertation could not have been attempted: Dr. Michiel Nijhoff at the Stedelijk Museum Archive, Amsterdam; Elisabeth Hvid and Dorte Kirkeby Andersen at the Asger Jorn Museum, Silkeborg; Cristina Perillo and Elvia Radaelli at the Archive of the Triennale di Milano, Milano; Elena Cazzaro at the ASAC – La Biennale di Venezia, Marghera (Ve); arch. Paola Albini and arch. Elena Albricci at the Fondazione Franco Albini, Milano and Enea Baldassi, at the Associazione Primi di Torviscosa, Torviscosa. Ad Petersen provided me with invaluable insight into Willem Sandberg's practice, generously sharing his knowledge with me.

Orietta Lanzarini has been an outstanding interlocutor, helping me to navigate my way through the history of Italian exhibition design; special thanks go also to Stefano Poli and to Professor Nico Stringa from the Università Ca' Foscari of Venezia, who some years ago when I was an MA student, guided me towards Paolo Marinotti's exhibitions at the Centro Internazionale delle Arti e del Costume, Venezia.

I am grateful to Francesco Bonami and Patrizia Sandretto Re Rebaudengo for allowing me to pursue my research while working at the Fondazione Sandretto Re Rebaudengo, Torino, as well as to my colleagues there, Irene Calderoni and Giorgia Bertolino, for their support and dialogue.

This research would not have been possible without the support of and countless conversations with my colleagues Olga Fernández López, Alice Motard, Boris Kremer, Natalie O'Donnell, Colin Perry, Maria Vittoria Martini, Katia Mazzucco, Francesca Recchia, Zasha Colah, Kate Stancliffe and Gloria De Risi.

I would like also to thank Michela Parkin for her invaluable help during the editing process and Nina Cannizaro for supporting me in the decision to begin this PhD.

Finally, I owe my gratitude to my family and friends, for their support and patience through the years.

The material included in this thesis has not been submitted wholly or in part for any academic award or qualification other than for which it is now submitted.

September 2013
