

## NOTES about the thesis, videos and appendix

I recommend first viewing the two videos in number order. The videos provide a brief overview of the research and the architectural multimedia (animations, film, prototype and drawings). Please use Safari or Firefox browsers, I noticed Edge and Chrome give 404 messages linking to Vimeo.

- Video 1 – The symposium method for CAREV and its systemic semiotic technoecology (12.5 minutes) available on Vimeo: <https://vimeo.com/manage/videos/952154609>
- Video 2 – A spatial investigation of a future smaller CAREV (CAREV-S) and the synthetically intelligent city (6 minutes) available on Vimeo: <https://vimeo.com/manage/videos/952178359>

Then, I suggest scanning through and leaving open the Appendix (numbered 4/4), which contain many of the drawings and architectural multimedia and supplementary information supporting the thesis. It will be helpful to access in the Appendix the large landscape A3 SPREADS format full sets of drawings, as the thesis contains selected drawings only.

The thesis is compiled in an A4 vertical format (numbered 3/4). The written A4 thesis, including drawings, photographs, and architectural multimedia, are cross referenced to the videos and the appendices. It is helpful to have the videos and appendices available when reading the thesis as they are interrelated.

Thanks, Colin
